

Environmental Consulting

Catalyst Group

Compliance. Anytime. Anywhere.

Biotechnology

Executive Summary

An Atlanta, GA based biotechnology client, prior to the FDA's pre-approval inspection, needed an environmental consultant who could lead the development and implementation of Air, Land, Water and Waste programs. Some specific deliverables included:

- Audit program development & execution

- Environmental Management System Implementation
- Specialized Environmental Training
- Technical Assessments

Challenges

The client needed on-site support immediately to meet critical deadlines. They had very specific needs with very high standards.

How We Helped

Scarlett He, PE, PMP, LEED AP, CHMM is an associate consultant at our Atlanta, GA office. She is a professional engineer and an experienced environmental professional with advanced experience in Hazard/Medical Waste Management, project management, environmental permitting and compliance. Her experience includes maintaining environmental related permits and license such as air, storm water and waste generator permits; generating environmental reports such as Spill Prevention Control and Countermeasure (SPCC) Plans, Stormwater Pollution Prevention Plans (SWPPP), RCRA hazardous waste generator programming; She has provided training for employees to comply with environmental regulations; inspected and monitored facility daily operation activities to ensure no environmental violations; served as key contact in coordinating with different level of regulation agencies for emergency incident occurrences. She has abundant work experience in environmental regulation compliance for commercial and industrial clients including coal-fired generating plants

Results

Scarlett was deployed immediately on-site and she is currently supporting all of the environmental programs with our client. We continue to work with the client to identify additional support needs.

About Us

A premier global consultancy, The Catalyst Group is trusted by clients to manage their most challenging environmental, health and safety issues.

Our reputation has been built on a foundation of solid technical and scientific excellence, innovation and client service. Our independent science-first approach ensures that our strategic advice is objective and defensible. We apply integrated multi-disciplinary services and tailor each solution to our client's specific needs and challenges. This approach transforms us from a company that just delivers a service to one that is a true partner in risk minimization.
